

GitHub Classroom - Guide to join intermediate tests

- Open the invitation link received

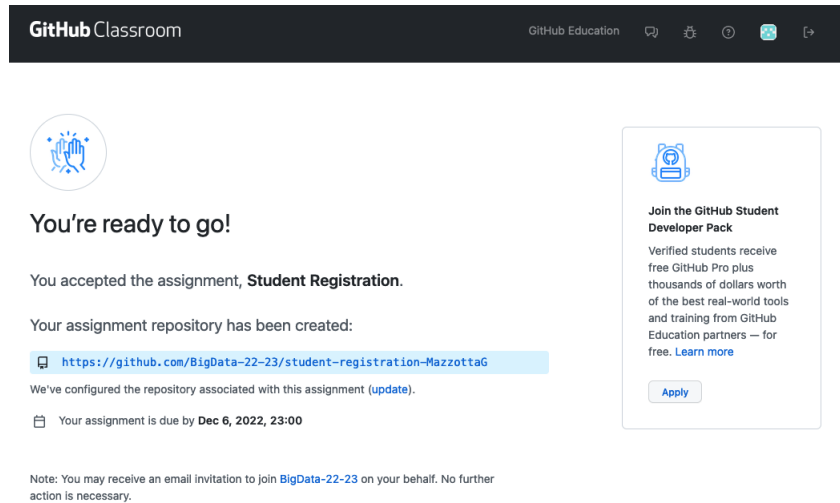

The screenshot shows the GitHub Classroom interface. At the top is a dark header with the 'GitHub Classroom' logo on the left and 'GitHub Education' with several icons on the right. The main content area has the heading 'Join the classroom:' followed by the course name 'BigData-22-23-Intermediate-Tests' in green. Below this, a paragraph explains that the user needs to select themselves from a list to associate their GitHub account with their school's identifier. A link 'Can't find your name? Skip to the next step →' is provided. The 'Identifiers' section contains a table with a header 'StudentId Name Surname' and a list of rows, each with a right-pointing arrow for selection.

Identifiers
StudentId Name Surname
....

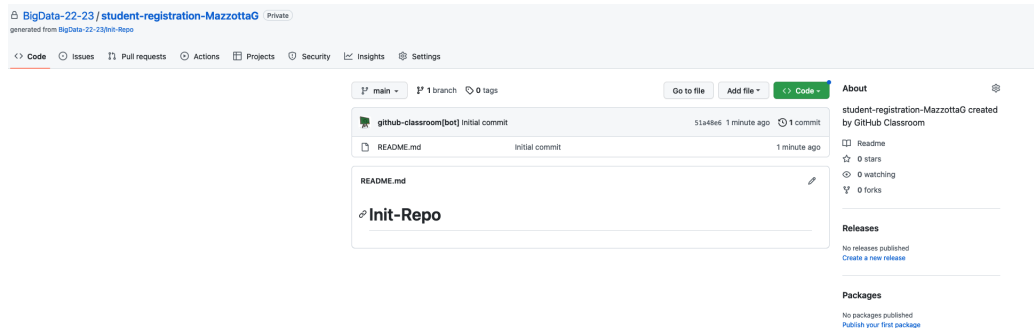

- Select the record with your StudentId Name and Surname

The screenshot shows the 'Accept the assignment' page in GitHub Classroom. The header is the same as the previous screenshot. The course name 'BigData-22-23-Intermediate-Tests' is displayed. The heading 'Accept the assignment — Student Registration' is shown, with 'Student Registration' in green. A paragraph explains that accepting the assignment grants access to the 'student-registration-MazzottaG' repository in the 'BigData-22-23' organization. At the bottom right, there is a green button labeled 'Accept this assignment'.

- Accept the assignment
- Acceptance could take few minutes. As soon as it is completed you will find the link of your repository

- Click on the reported link to open the github page of your repository

- In this repository you will find the pdf with the proposed assignment and you have to use it to submit the solution of the intermediate test.
